

investing in your future

Greetings from the
Alpine Space Programme

AlpCheck 2

The programme is co-funded
by the European Regional
Development Fund

AlpCheck 2

The sharp increase in road traffic volumes observed in the last few decades, calls for integrated territorial strategies aimed at improving traffic efficiency and favouring a modal shift, whilst at the same time exploiting the potentials of ICT. AlpCheck2 responded to these challenges by proposing innovative solutions to the provision of traffic monitoring and management services. The project developed, tested and evaluated specific methods and tools for enhancing road transport efficiency, competitiveness and sustainability. It now provides free on-line access to a vast set of traffic data combined with future traffic scenarios and environmental data, which are ready to use for traffic monitoring and management.

Key achievements

- + Transport Decision Support System (with 2 components: transportation planning and traffic management) and 17 traffic scenarios.
- + 1 platform for an on-line freight stock market
- + 1 methodology for evaluating modal shift policies

EU support (ERDF) of over € 2,391,000

Duration 09.2009 - 07.2012

A shared rationale approach towards sustainable transport management and planning in the Alpine regions
