

Changeable Mostviertel. Fit into climate future.

Fact sheet

as of October 2013

Objectives

EU project “C3-Alps“:

Capitalising climate change knowledge for adaption in the alpine space.

Pilot Area Lower Austria: “Changeable Mostviertel. Fit into climate future.“

Securing communal projects and the future development of the community with regard to local climate changes and taking into account social, economic and ecological resources. Together with the mayors and their teams we want to create a stable basis for future decisions.

- benefiting from available CCA - knowledge
- transferring know-how to municipalities / region
- preparing knowledge for decision makers

© weinfranz

Factoring in climate change in advance adds to sustainable communal development and permits tapping the full potential of future chances.

7 pilot municipalities develop action plans for community-specific topics:

municipality	topics / working title	sectors	main target groups
Frankenfels	inter-generational responsibility in times of climate change	energy, tourism, social affairs	citizens, esp. youth, tourists
Gaming	appreciation of forests and their functions	forestry, tourism, education	citizens, tourists, educational institutions
Kirchberg/Pielach	energy-efficiency-model-municipality	energy	citizens, esp. youth, municipal administration
Luncz am See	maintainance of local supply in a broader sense (goods for daily life, education and health facilities)	tourism, social affairs, economy	citizens, tourists
Mank	Mank on its way to energy-self-sufficiency	energy, mobility	citizens, educational institutions, municipal administration
Ober-Grafendorf	food sovereignty and soil conservation	agriculture, social affairs	citizens, farmers
Scheibbs	securing of food, water and energy	agriculture, water management, energy	citizens, educational institutions, municipal administration

Further information on www.klimabuendnis.at/wandelbares.mostviertel and at the

Mid-term conference: November 4, 2013, 5:30 pm, Kartause Gaming (Gaming charterhouse)

Representatives from the pilot municipalities give reports on their **motivations**, initial **implementation** successes, **projects** and **initiatives**.

Activities and methods

Supporting implementation of community projects

- workshops in every pilot municipality
- expert key lectures
- process support
- tailor-made offers

2nd workshop in Kirchberg an der Pielach

Visualization of activities in social media

- blog: activity reports from municipalities and Climate Alliance
- podcast: audio recordings from expert key notes on website
- video: expert key notes, mid-term conference, school workshops
- graphic recording: visualization of municipality presentations
- photo gallery on flickr

Networking

- between municipalities: events, website, blog
- with regional partner organizations, multipliers
- with experts
- co-operation with St. Pölten UAS Media Technology

7 mayors make their municipalities fit for climate future

Knowledge transfer and processing

- target-group-specific transfer of CCA-knowledge, funding programs, experts
- expert key notes at events
- creative approach using various methods
- reporting of activities and results, dissemination

Dr.ⁱⁿ Maria Balas, Umweltbundesamt (federal office for environment)

Educational work and public relations

- co-operation with educational institutions, school workshops
- templates for community media
- articles in journals and regional media
- website: www.klimabuendnis.at/wandelbares.mostviertel.at
- newsletter
- roadshow: e.g. Conferene on sustainability - Mostviertel, Climate Star 2014, Lower Austria Provincial Exhibition 2015 ...

school workshop
