

Side Programme – Risk Session, Tuesday 20th June 2006, 9:00 – 11:00

Today's Alps tomorrow: risks, resources and opportunities

Introduction to the Risk session

Presentations from projects

- 1) METEORISK - the coordination of weather warnings in the Alps
- 2) FORALPS - contributions for a wise management of water resources from meteorology and climatology
- 3) ALPRESERV - sediment management and reservoirs to safeguard flood protection ability
- 4) MONARPOP – monitoring network in the Alpine Regions for persistent and other organic pollutants (POPs)
- 5) CATCHRISK - mitigation of hydro-geological risk in Alpine catchment: project impacts
- 6) NAB - aspects of natural hazards prevention by biological means
- 7) DIS-ALP - an example of disaster documentation of hazard events in the Alpine Space
- 8) ALPS-GPSQUAKENET - Mountain building and natural hazards

Discussion and exchange of ideas
