

# Alpine Space Conference

Building on Experience:  
Cooperation towards 2020

14 | 20

---

Salzburg | Austria | 21|22 October 2014

# About

The Alpine Space Programme is the EU transnational cooperation programme for the Alps. Partners from the seven Alpine countries work together to promote regional development in a sustainable way. During the period 2007-2013, the Programme invested €130 million in impact-oriented projects. These focused on competitiveness and attractiveness, accessibility and connectivity, environment and risk prevention. The Programme will continue in 2014-2020 and fund projects in the following four priorities: Innovative Alpine Space, Low Carbon Alpine Space, Liveable Alpine Space and Well-governed Alpine Space.

Over the past 15 years, more than a thousand project partners have collaborated on bringing common solutions in order to jointly tackle Alpine challenges. The Alpine Space Programme has now entered a new chapter of cooperation and will build on this common experience to pave the way to Europe 2020.

Marking the transition between two programming periods, the Alpine Space 2020 Conference presents the results achieved over the past seven years, and prepares the ground for future cooperation projects on sustainable regional development. This occasion brings together current and potential project partners as well as stakeholders and policy-makers of the area.

The format of this conference, from the “action labs” in the plenary to the “idea arena”, is designed to stimulate contact-making, and to encourage the emergence of new cooperation networks. We invite you to take advantage of this opportunity to shape the 2020 vision for the Alpine Space!

# Tuesday 21 October

---

**09:00**      **Registration**

---

**09.30**      **Welcome & Introduction** Europe Hall

- + Astrid Rössler, Vice-Governor Land Salzburg, Austria
- + Heinz Schaden, Mayor of Salzburg
- + Christian Salletmaier, Head of Managing Authority, Land Salzburg

---

**09:45**      **European and regional challenges in the Alpine Space**

Discussion on Cohesion Policy and challenges in the Alpine Region in 2014-2020.

- + Marie-Christine Fourny, University Joseph-Fourier, Grenoble, France
- + Jose Antonio Ruiz de Casas, European Commission, Directorate-General for Regional and Urban Policy (video input)
- + Peter Eggensberger, Bavarian Ministry for the Environment and Consumer Protection, Germany

---

**10:45**      **Coffee break**

---

**11:15**      **Project achievements and priorities for 2014+**

Introduction to the Alpine Space Programme 2014-2020

- + Christina Bauer, Managing Authority, Alpine Space Programme
- + Thomas Fleury, Joint Secretariat, Alpine Space Programme

---

**11:30**       **Priority 1 Innovative Alpine Space**

Presentation of key achievements from projects and rationale of the new priority 1.

Action lab: brainstorming in the audience on potential action ideas for this priority.

- + Project representatives:
  - Ivan Boesso, AlpClusters2020 project, Veneto Innovazione S.p.A., Italy
  - Roberto Zuffada, SPHERA project, Lombardy Region, Italy
  - Caroline Pecher, WIKIAlps project, EURAC, Italy
- + Anne Rizand, Prefecture of the Rhône-Alpes Region, National Coordinator, France
- + Action Lab

---

**12:30**      **Lunch**

---

**13:45**

## **Project achievements and priorities for 2014+ (continued)**

### **Priority 2 Low Carbon Alpine Space**

Presentation of key achievements from projects and rationale of the new priority 2.

Action lab: brainstorming in the audience on potential action ideas for this priority.

+ Project representatives:

- Anja Lehmann, AlpEnMAT project, B.A.U.M. Consult GmbH, Germany
- Robert Moosbrugger, ViSiBLE project, Regional Development Vorarlberg, Austria

+ Adriana May, Lombardy Region, Presidency of Italian National Committee

+ Action Lab

**14:30**

### **Priority 3 Liveable Alpine Space**

Presentation of key achievements from projects and rationale of the new priority 3.

Action lab: brainstorming in the audience on potential action ideas for this priority.

+ Project representatives:

- Jochen Bürgel, C3-Alps project, Environmental Agency of Austria
- Maximo Peviani, AIM project, RSE S.p.A., Italy
- Chris Walzer, greenAlps project, University of Veterinary Medicine, Austria

+ Florian Ballnus, Bavarian Ministry for the Environment and Consumer Protection, National Coordinator Germany

+ Action Lab

**15:15**

## **Fresh air break**

Get a breath of fresh air before the idea arena!

**15:30**

## **Idea arena**

Networking session along the first 3 priorities of the

Alpine Space Programme 2014-2020.

Priority 1: [Karajan Hall](#) | Priority 2: [Paracelsus Hall](#) | Priority 3: [Wolf-Dietrich Hall](#)

**17:00**

## **Closing of day one**

**19.30**

## **Networking aperitif and dinner at the Salzburg “Residenz” Palace**

# Wednesday 22 October

---

**09:00**      **Welcome second day** Europe Hall

---

**09:15**      **Cooperation challenges in the Alpine Region**

Political session on governance and cooperation challenges in the Alps for 2014-2020

- + Brigitta Pallauf, President of the Land Salzburg Parliament, Austria
- + Ulrike Scharf, Bavarian State Minister for the Environment and Consumer Protection, Germany
- + Claire Bouchet, member of the French Alps Committee, Councillor for regional action for the Alps in Provence-Alpes-Côte d'Azur Region, France
- + Cassiano Luminati, President of the Valposchiavo Region, Switzerland

---

**10:00**      **The future of governance for the Alpine Region**

Discussion on current status and developments of the EU Strategy for the Alpine Region

- + Vicente Rodriguez Saez, Directorate-General for Regional and Urban Policy, European Commission
- + Raffaele Raja, Chair of Steering Group of EUSALP, Lombardy Region
- + Christian Baumgartner, 3rd Vice President CIPRA International, Naturfreunde Internationale
- + Markus Reiterer, Secretary General of the Alpine Convention
- + Christian Salletmaier, Head of Managing Authority, Alpine Space Programme

---

**11:00**      **Coffee break**

---

**11:30**      **A la carte**

Parallel sessions

**A: Capitalisation and impact: the big picture** Karajan Hall

Session on project and programme impact on policies and institutional capacity building

- + Christina Bauer, Managing Authority, Alpine Space Programme
  - + Markus Haller, Munich transport association (MWV), Germany
  - + Matthias Rinderknecht, Swiss Federal Office of Transport
  - + Barbara Simonič, Ministry of the Environment and Spatial Planning, Slovenia
  - + Michael Vogel, Berchtesgaden National Park, Germany
-

## **B: Project submission and management in 2014-2020** Europe Hall

How will the Alpine Space Programme 2014-2020 work?

Get first-hand information here!

- + Antonia Widmer-Leitz, Joint Secretariat, Alpine Space Programme  
Joint Secretariat Team

## **C: Working session on priority 4 for 2014-2020: Well-governed Alpine Space** Wolf-Dietrich Hall

- + Silvia Jost, Swiss Federal Office for Spatial Development ARE, National Coordinator  
Alpine Space Programme

---

**12:30**

## **The essentials to take home** Europe Hall

### **Wrap up**

- + Victoria Primhak, facilitator

### **Get a glimpse of the first call for project proposals!**

- + Antonia Widmer-Leitz, Joint Secretariat, Alpine Space Programme

## **Closing and farewell**

- + Florian Ballnus, Bavarian Ministry for the Environment and Consumer Protection,  
Chair of the Alpine Space Programme Committee

---

**13.00**

## **Lunch**

---

**14.00**

## **Excursion programme** (more information at the registration desk)

---

# Programme intervention logic

from the Cooperation Programme submitted to the European Commission

Priority Axis

1

**INNOVATIVE  
ALPINE SPACE**

**Specific objectives**

Improve the framework conditions for innovation in the Alpine Space

Increase capacities for the delivery of services of general interest in a changing society

Priority Axis

2

**LOW CARBON  
ALPINE SPACE**

**Specific objectives**

Establish trans-nationally integrated low carbon policy instruments

Increase options for low carbon mobility and transport

Priority Axis

3

**LIVEABLE  
ALPINE SPACE**

**Specific objectives**

Sustainably valorise Alpine Space cultural and natural heritage

Enhance the protection, the conservation and the ecological connectivity of Alpine Space ecosystems

Priority Axis

4

**WELL-GOVERNED  
ALPINE SPACE**

**Specific objectives**

Increase the application of multilevel and transnational governance in the Alpine Space

# Innovative Alpine Space

## Specific objective 1b.1

**Improve the framework conditions for innovation in the Alpine Space**

### Expected result

Improved framework conditions for stakeholders in the fields of research and innovation; enhanced potential for business innovation using research results on topics of Alpine Space importance

### Result indicator

Level of maturity of framework conditions for generating innovation process among business, academia and administration

### Types of actions

- Set up transnational frameworks, platforms and networks for the identification of existing innovation resources, potentials and obstacles, as well as the valorisation of proven concepts in the fields of technology, business, social services and governance (mapping of resources, studies, pilots and strategies on research and innovation needs, market and product development potentials, human resources etc.);
- Set up transnational frameworks, platforms and networks for the coordination of innovation policy (coordination of regional and national RIS3 strategies, innovation alliances, resources pooling structures, integrated supply chains, innovation governance initiatives and competence networks);
- Develop transnationally designed products, services, investment models and funding support instruments of business support centres, chambers of commerce, public administration and financing institutions with emphasis on start-ups and dynamically growing SMEs;
- Develop contents and adapt education and training concepts for the uptake and diffusion of innovation and the provision of capacity development mechanisms;
- Develop transnational models for the design, testing, up-scaling, comparison and evaluation of innovations (policies, tools, processes, actors, organisations and interfaces) in the fields of business innovation, services of general interest, social services and public administration;
- Develop transnational models for the design and testing of open innovation modes of cooperation;
- Set up a policy foresight for governance challenges and cooperation modes in relation to the Alpine Space driving forces, innovative tools, approaches and participation procedures.

### Output indicators

- Number of supported transnational cooperation structures improving the framework conditions for innovation;
- Number of developed strategic elements improving the framework conditions for innovation;
- Number of developed implementation elements improving the framework conditions for innovation

## Specific objective 1b.2

**Increase capacities for the delivery of services of general interest in a changing society**

### Expected result

More efficient, adaptable and adequate services of general interest through developing, testing and adopting new social innovation solutions; more efficient, adaptable and “fit for purpose” services of comparable quality in the entire Alpine Space

### Result indicator

Level of capacity of social organisations and public authorities to deliver innovation in the field of social services and services of general interest

### Types of actions

- Set up transnational frameworks, platforms and networks for the identification of existing innovation resources, potentials and obstacles, as well as the valorisation of proven concepts in the fields of technology, business, social services and governance (mapping of resources, studies, pilots and strategies on research and innovation needs, market and product development potentials, human resources etc.);
- Develop contents and adapt education and training concepts for the uptake and diffusion of innovation and the provision of capacity development mechanisms;
- Develop transnational models for the design, testing, up-scaling, comparison and evaluation of innovations (policies, tools, processes, actors, organisations and interfaces) in the fields of business innovation, services of general interest, social services and public administration;
- Develop transnational models for the design and testing of open innovation modes of cooperation;
- Design local, regional and transnational action plans for social inclusion via set-up of social enterprises as a demonstration of the feasibility of the innovative transnational concepts;
- Set up models and test pilot actions for a better participation of all social groups, actors and users in the design and delivery of social services and services of general interest;
- Set up a policy foresight for governance challenges and cooperation modes in relation to the Alpine Space driving forces, innovative tools, approaches and participation procedures.

### Output indicators

- Number of supported transnational cooperation structures increasing capacities for the delivery of services of general interest in a changing society;
- Number of developed strategic elements increasing capacities for the delivery of services of general interest in a changing society;
- Number of developed implementation elements increasing capacities for the delivery of services of general interest in a changing society

## Types of beneficiaries

Local Public Authorities; Regional Public Authorities; National Public Authorities; Agencies; (Public) service providers; Higher education institutions; Education/training centres; Business support organisations; Enterprises, including SME, if relevant; Interest groups, including NGOs

# Low Carbon Alpine Space

## Specific objective 4e.1

### Establish trans-nationally integrated low carbon policy instruments

#### Expected result

Established low carbon policy instruments in the area with practical responses to the specific needs and challenges, spatial development policies, strategies and processes through the combination of available or potential technological and operational innovations and tools in low carbon systems.

#### Result indicator

Level of implementation of low carbon policy instruments

#### Types of actions

- Set up transnational frameworks, platforms and networks for the identification of existing innovation resources, potentials and obstacles in the fields of low carbon economy and low carbon mobility and transport (mapping of resources, studies, pilots and strategies on research and application needs, market and product development potentials, prerequisites and "soft" factors for implementation etc.);
- Develop research to business networks and cooperation structures on relevant issues for capitalisation and/or generation of Alpine Space low carbon applications and technologies (conversion to a post carbon energy system through energy saving, energy efficiency, decentralised energy grids based on renewable resources, energy saving settlement patterns and public transports etc.);
- Develop policy networks, strategies, models and toolboxes (e.g. of an Alpine Space climate footprint system, "carbon proofing" tools for integrated spatial development policies, strategies and processes etc.) for setting up local/regional low carbon model areas and regions including special needs areas such as nature protection regions;
- Set-up networks for the ex-ante assessment of the maturity and the anticipated impacts and the monitoring of the outcomes of low carbon policies, technologies and applications. Foster the promotion of debate among stakeholders, governance and citizens, the generation of creative ideas and the provision of capacity development mechanisms;
- Set up, test and implement negotiation, mediation, participation and conflict resolution models and standards for the adoption and implementation of low carbon policies, technologies and applications.

#### Output indicators

- Number of supported transnational cooperation structures aiming at establishing trans-nationally integrated low carbon policy instruments;
- Number of developed strategic elements aiming at establishing trans-nationally integrated low carbon policy instruments;
- Number of developed implementation elements establishing trans-nationally integrated low carbon policy instruments

## Specific objective 4e.2

### Increase options for low carbon mobility and transport

#### Expected result

Integrated organisation of spatial interaction, economic activity and mobility and transport patterns in order to provide the prerequisites for a low carbon economy and society; increased options for low-carbon mobility and transport by adopting technological, financial and organisational solutions taking also in account climate change aspects, resource efficiency and resilience.

#### Result indicator

Level of potential to access and use low carbon mobility and transport options

#### Types of actions

- Set up transnational frameworks, platforms and networks for the identification of existing innovation resources, potentials and obstacles in the fields of low carbon economy and low carbon mobility and transport (mapping of resources, studies, pilots and strategies on research and application needs, market and product development potentials, prerequisites and "soft" factors for implementation etc.);
- Develop policy networks, strategies, models and toolboxes (e.g. of an Alpine Space climate footprint system, "carbon proofing" tools for integrated spatial development policies, strategies and processes etc.) for setting up local/regional low carbon model areas and regions including special needs areas such as nature protection regions;
- Set-up networks for the ex-ante assessment of the maturity and the anticipated impacts and the monitoring of the outcomes of low carbon policies, technologies and applications. Foster the promotion of debate among stakeholders, governance and citizens, the generation of creative ideas and the provision of capacity development mechanisms;
- Set up, test and implement negotiation, mediation, participation and conflict resolution models and standards for the adoption and implementation of low carbon policies, technologies and applications;
- Support the transfer and uptake of existing local/regional solution and instruments and shape a framework for capitalisation of on-going technological innovation for a more sustainable organisation of mobility and transport including inter-modality and ICT applications;
- Design and test operational, technological and funding models for low carbon mobility and transport;
- Develop tools to better integrate/coordinate mobility and transport strategies and plans of regions.

#### Output indicators

- Number of supported transnational cooperation structures Increasing options for low carbon mobility and transport;
- Number of developed strategic elements Increasing options for low carbon mobility and transport;
- Number of developed implementation elements for low carbon mobility and transport

## Types of beneficiaries

Local Public Authorities; Regional Public Authorities; National Public Authorities; Agencies; Infrastructure and (public) service providers; Higher education institutions; Business support organisations; Enterprises including SME; Interest groups, including NGOs

# Liveable Alpine Space

## Specific objective 6c.1

### Sustainably valorise Alpine Space cultural and natural heritage

#### Expected result

Increased consistent, balanced and sustainable use of the Alpine Space cultural and natural heritage by increasing awareness on the present potential and future challenges and developing new solutions

#### Result indicator

Level of implementation of sustainable valorisation of cultural and natural heritage of the Alpine Space

#### Types of actions

- Organise knowledge transfer, exchange of good practice examples, networking and development of innovations concerning models for non-profit organisations and voluntary work in the cultural, arts and social sector;
- Develop Alpine Space wide cultural initiatives to promote a transnational Alpine identity, enhance awareness and envisage what the future Alpine cultural heritage could be;
- Develop education, training, qualification and capacity development models and networks; and set up of pilot actions to re-invent traditional jobs in an innovative context;
- Design implementation strategies, set up and test of models to better capitalize and innovate Alpine cultural and natural heritage by enterprises, research institutions, NGOs and local population using exchange of experiences, mutual learning and pilot activities;
- Design implementation strategies, set up models and test pilot actions to combine tourism with the promotion and protection of Alpine natural and cultural heritage;
- Set up, test and implement negotiation, mediation, participation and conflict resolution models in the context of tourism, culture, local needs and aspirations and economic growth in the context of cultural and natural heritage;
- Develop and test control systems for the labelling and funding of green and fair products respecting and promoting Alpine Space cultural and natural heritage.

#### Output indicators

- Number of supported transnational cooperation structures aiming at the implementation of sustainable valorisation of cultural and natural heritage of the Alpine Space;
- Number of developed strategic elements aiming at the implementation of sustainable valorisation of cultural and natural heritage of the Alpine Space;
- Number of developed implementation elements sustainably valorising cultural and natural heritage of the Alpine Space.

## Types of beneficiaries

Local Public Authorities; Regional Public Authorities; National Public Authorities; Agencies; Higher education institutions; Education/training centres; Business support organisations; Enterprises, including SMEs; Interest groups, including NGOs

## Specific objective 6d.1

### Enhance the protection, the conservation and the ecological connectivity of Alpine Space ecosystems

#### Expected result

Harmonised management approaches, improved knowledge transfer and shared responsibilities with the goal of integrating Alpine Space ecosystems functions and needs into policies

#### Result indicator

Level of integration of the ecosystem services approach in the policy systems of the Alpine Space

#### Types of actions

- Set up transnational frameworks and platforms for the interoperability of existing databases, promotion of data availability and the integration of management approaches (hazard and risk assessment, planning methodologies, management plans, sustainability and adaptation assessments etc.);
- Develop concepts, strategies, models and pilots for sustainable and innovative management of resources, green infrastructure and biodiversity, landscape management and green corridors;
- Set up, test and implement negotiation, mediation, participation and conflict resolution models in the context of land use, management of Alpine resources and assets with a view to diverging interests of stakeholders and territories;
- Design implementation strategies, set up models and test pilot activities and transnational, regional and intercommunity cooperation of risk management (risk assessment, risk communication, risk managing measures and hazard prevention) as a tool of ecosystem conservation and protection;
- Set up networks and partnerships for the provision of capacity development mechanisms in order to develop alternative valorisation approaches for Alpine ecosystem services, increase awareness and integrate them in the implementation of policies.

#### Output indicators

- Number of supported transnational cooperation structures aiming to enhance the protection, the conservation and the ecological connectivity of Alpine Space ecosystems;
- Number of developed strategic elements aiming to enhance the protection, the conservation and the ecological connectivity of Alpine Space ecosystems
- Number of developed implementation elements enhancing the protection, the conservation and the ecological connectivity of Alpine Space ecosystems

## Types of beneficiaries

Local Public Authorities; Regional Public Authorities; National Public Authorities; Agencies; Higher education institutions; Education/training centres; Business support organisations; Interest groups including NGOs

# Well-governed Alpine Space

## Specific objective 11.1

### Increase the application of multilevel and transnational governance in the Alpine Space

---

#### Expected result

Increased multilevel and transnational governance by triggering and guiding the debate for governance innovation in the Alpine Space and by supporting public administrations in re-defining their tasks, approaches, services and processes by developing, testing and adopting innovative solutions through transnational cooperation

---

#### Result indicator

Level of application of multilevel and transnational governance in the Alpine Space

---

#### Types of actions

- Set up transnational frameworks, platforms and networks for the identification of existing resources and obstacles, as well as the valorisation of proofed concepts in the field of governance (mapping of resources, studies, pilots and strategies governance needs, development potentials, human resources etc.);
  - Set up frameworks for the stimulation and coordination of projects and initiatives responding to the identified resources, obstacles and concepts;
  - Strategic processes to check the feasibility of new projects and initiatives;
  - Develop transnational models for the design, testing, up-scaling, comparison and evaluation of innovations (tools, processes, actors, organisations and interfaces) in the field of public administration;
  - Set up a policy foresight for governance challenges in relation to the Alpine Space driving forces;
  - Develop innovative models for institutional co-operation and spatial organisation for and between different territorial types;
  - Set up frameworks for knowledge transfer and capitalisation activities addressing the entire Alpine governance through a more active involvement especially of non-institutional actors, like civil society organisations;
  - Develop instruments for monitoring, reporting and evaluating multilevel and transnational policy instruments;
  - Design implementation strategies, set up models and test pilot actions for successful and reciprocal communication of public administrations among them and with the civil society;
  - Design implementation strategies, set up models and test pilot actions for a better participation of all social groups in the regional and local governance systems;
  - Develop contents and adapt education and training systems and capacity development mechanisms for the uptake and implementation of multilevel and transnational governance.
- 

#### Output indicators

- Number of supported transnational cooperation structures encompassing multilevel and transnational governance in the Alpine Space;
- Number of developed strategic elements aiming at the increase of the application of multilevel and transnational governance in the Alpine Space;
- Number of developed implementation elements applying multilevel and transnational governance in the Alpine Space

## Types of beneficiaries

Local Public Authorities; Regional Public Authorities; National Public Authorities; Agencies; Higher education institutions; Education/training centres; Business support organisations; Interest groups including NGOs

# Useful information

## Organiser

Alpine Space Programme

## Host

Land Salzburg  
Bavarian Ministry for the Environment and  
Consumer Protection

## Conference Venue

Salzburg Congress  
Auerspergstraße 6  
5020 Salzburg  
[www.salzburgcongress.at](http://www.salzburgcongress.at)

## Conference Secretariat during the event

Emergency mobile: +49 172 3266505  
(Operational during Conference hours)  
[jts@alpine-space.eu](mailto:jts@alpine-space.eu)

## Dinner

### Tuesday 21 October 19:30

Salzburg "Residenz" Palace  
Residenzplatz 1  
5020 Salzburg  
[www.salzburg-burgen.at/en/residenz/](http://www.salzburg-burgen.at/en/residenz/)  
The palace is a 15 minutes walk from the venue.

## Excursion

### Wednesday 22 October 14:00

A choice between:

- 1. Visit of the BAU Akademie Lehrbauhof Salzburg (AlpHouse and CABEE projects)
  - 2. Salzburg guided walking tour
  - 3. Visit of the DOMQUARTIER Salzburg
- [www.alpine-space.eu/AS2020excursions](http://www.alpine-space.eu/AS2020excursions)

**1** Conference venue

**2** Dinner venue

**3** Train station

# Greening

The Alpine Space Programme has striven to organise this Conference in a sustainable and environmentally friendly manner:

The Programme has actively encouraged participants to consider the environment when making their travel and accommodation arrangements.

The use of online communication with participants has and will be maximised in order to reduce waste. Conference papers have also been limited to the essentials.

Programme documents produced for this event are printed on certified 100% recycled material.

All event locations, including dinner reception and excursions, have been chosen based on their proximity to the venue.

Booked hotels have also been chosen based on their walking distance from the venue.

The use of local, and in the case of the dinner reception, organic, products has been prioritised for the catering of this event

Tap water will be provided for drinking at the conference venue.

The conference venue is committed to standards of sustainability and powered by renewable energy. The venue also holds an Austrian Environmental Seal of Approval award for upholding Ministerial environmental guidelines.
