

# A NEW CONCEPT OF CIVIL PROTECTION PLAN

## 1 INVESTIGATED HAZARDS

- **Characterisation of the hazards on the territory**
  - Source of information
  - Affected areas
  - Expected impacts
- **Strengths and weaknesses of the available data with regard to safeguarding Cultural Heritage**

## 2 CULTURAL HERITAGE IN THE AREA

- **Identification of Cultural Heritage on the territory**
- **Strengths and weaknesses of the available geo-referenced catalogues**

## 3 EARLY WARNING SYSTEMS

- **Operating warning systems**
- **Alerts communication**

## 4 RISK SCENARIO

- **Definition of the reference risk event**
- **Forewarning time**
- **Identification of the exposed items**
- **Intervention priorities**
  - value of the exposed Cultural Heritage
  - vulnerability, risk, and priorities of intervention
- **Definition of interventions (prevention, protection, and stabilisation) to safeguard the exposed assets and time needed for their implementation**
- **Estimation of human resources (skills) needed to manage the risk scenario within the forewarning time**
- **Estimation of means and materials**

## 5 RESOURCES AVAILABLE

- **Human resources** (composition and number of response teams)
- **Means and materials**

## 6 INTERVENTION MODEL

- **Rough deployment model for interventions**
- **Definition of the command-and-control chain**
- **Operations of the intervention coordination centres**
- **Operating procedures**
