Introduction ..... 3

Overview of financial operators in the Alpine Space offering financial support to SMEs with circular transformation..... 4

## Introduction

The goal of this deliverable *D.T2.4.1 Mapping financial actors and investors* was to collect data in each project area concerning their public and financial services and instruments that are offered to small and medium sized enterprises to implement digitalized processes in a circular economy.

Each project area collected several operators (financial actors and investors) and listed it in the provided table. Mapped were the following data:

- Name of the operator,
- Type of the operator,
- Description,
- Ownership,
- Whether it is a new financial tool to support circular economy or not,
- The region the operator is active in, types of products the operator offers,
- Whether it has a specific digitalisation or green/circular focus and the link of the website.

All together 85 operators were mapped in 15 project areas with most of them in French regions, followed by Italy and Germany.

A plethora of financial operators in the Alpine Space region range from venture capital, public and private investors, incubators, regional/national/local public government agencies and national/regional authorities, public and private banks, business angels, equity companies, lawyers and private individual investors and asset management companies and insurances including crowdfunding operators.

**Full list of financial services is available over the Circular 4.0 project web site and as a project report in the scope of D.T.2.4.1. over e-platform:  [D.T2.4.1 Financial Mapping\\_final.xlsx](#)**

# Overview of financial operators in the Alpine Space offering financial support to SMEs with circular transformation

	Response Options	Operator 1	Operator 2	Operator 3	Operator 4	Operator 5
